

Unique Horizontals & 3-D Sun Screens add Interest to Harvard Curtainwall

Design element or functional sun screen?

*Weiss products accomplish both
as they enhance the building's
energy savings and create
an attractive facade.*

Architect: Ellenzweig Associates
Contractor: Barr & Barr Inc.
Karas & Karas
Product: Sun Screen
Location: Cambridge, MA

Accent trims at the floor levels (top right) and sun shades which extend from the buildings facade create a unique look the architect desired for Harvard's, Naito Chemistry building (above and right). Weiss was also tasked with the creation of custom fabricated stainless steel brackets to securely hold the sun screen fins in place. Custom Verticals were also used (left) which angled out slightly from the curtainwall facade.
